

12

荔枝窩客家圍村 Lai Chi Wo Village

該地點具有地質意義，碼頭的西邊有花崗岩與沉積物的良好接觸，東邊有暴露的黑色黃鐵礦碳質頁岩。這些都是香港罕見的地質特徵。

The site is of geological interest, to the west of the pier there is a good contact of granite with sediments and to the east there is exposure of black pyritic carbonaceous shales. These are rare geological features in Hong Kong.

13

新娘潭 Bride's Pool

該地點具有地質意義，碼頭的西邊有花崗岩與沉積物的良好接觸，東邊有暴露的黑色黃鐵礦碳質頁岩。這些都是香港罕見的地質特徵。

The site is of geological interest, to the west of the pier there is a good contact of granite with sediments and to the east there is exposure of black pyritic carbonaceous shales. These are rare geological features in Hong Kong.

14

船灣淡水湖水壩 Plover Cove Reservoir Dam

該地點具有地質意義，碼頭的西邊有花崗岩與沉積物的良好接觸，東邊有暴露的黑色黃鐵礦碳質頁岩。這些都是香港罕見的地質特徵。

The site is of geological interest, to the west of the pier there is a good contact of granite with sediments and to the east there is exposure of black pyritic carbonaceous shales. These are rare geological features in Hong Kong.

15

老虎笏 Lo Fu Waf

該地點具有地質意義，碼頭的西邊有花崗岩與沉積物的良好接觸，東邊有暴露的黑色黃鐵礦碳質頁岩。這些都是香港罕見的地質特徵。

The site is of geological interest, to the west of the pier there is a good contact of granite with sediments and to the east there is exposure of black pyritic carbonaceous shales. These are rare geological features in Hong Kong.

16

印洲塘 Double Haven

該地點具有地質意義，碼頭的西邊有花崗岩與沉積物的良好接觸，東邊有暴露的黑色黃鐵礦碳質頁岩。這些都是香港罕見的地質特徵。

The site is of geological interest, to the west of the pier there is a good contact of granite with sediments and to the east there is exposure of black pyritic carbonaceous shales. These are rare geological features in Hong Kong.

17

紅石門 Hung Shek Mun

該地點具有地質意義，碼頭的西邊有花崗岩與沉積物的良好接觸，東邊有暴露的黑色黃鐵礦碳質頁岩。這些都是香港罕見的地質特徵。

The site is of geological interest, to the west of the pier there is a good contact of granite with sediments and to the east there is exposure of black pyritic carbonaceous shales. These are rare geological features in Hong Kong.

18

鹿湖峒 Luk Wu Tung

該地點具有地質意義，碼頭的西邊有花崗岩與沉積物的良好接觸，東邊有暴露的黑色黃鐵礦碳質頁岩。這些都是香港罕見的地質特徵。

The site is of geological interest, to the west of the pier there is a good contact of granite with sediments and to the east there is exposure of black pyritic carbonaceous shales. These are rare geological features in Hong Kong.

19

鬼手岩 Devil's Fist

該地點具有地質意義，碼頭的西邊有花崗岩與沉積物的良好接觸，東邊有暴露的黑色黃鐵礦碳質頁岩。這些都是香港罕見的地質特徵。

The site is of geological interest, to the west of the pier there is a good contact of granite with sediments and to the east there is exposure of black pyritic carbonaceous shales. These are rare geological features in Hong Kong.

20

赤洲 Port Island

該地點具有地質意義，碼頭的西邊有花崗岩與沉積物的良好接觸，東邊有暴露的黑色黃鐵礦碳質頁岩。這些都是香港罕見的地質特徵。

The site is of geological interest, to the west of the pier there is a good contact of granite with sediments and to the east there is exposure of black pyritic carbonaceous shales. These are rare geological features in Hong Kong.

21

塔門 Tap Mun

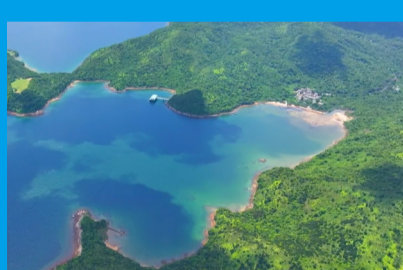

該地點具有地質意義，碼頭的西邊有花崗岩與沉積物的良好接觸，東邊有暴露的黑色黃鐵礦碳質頁岩。這些都是香港罕見的地質特徵。

The site is of geological interest, to the west of the pier there is a good contact of granite with sediments and to the east there is exposure of black pyritic carbonaceous shales. These are rare geological features in Hong Kong.

22

海下 Hoi Ha

該地點具有地質意義，碼頭的西邊有花崗岩與沉積物的良好接觸，東邊有暴露的黑色黃鐵礦碳質頁岩。這些都是香港罕見的地質特徵。

The site is of geological interest, to the west of the pier there is a good contact of granite with sediments and to the east there is exposure of black pyritic carbonaceous shales. These are rare geological features in Hong Kong.

23

黃石碼頭 Wong Shek Pier

該地點具有地質意義，碼頭的西邊有花崗岩與沉積物的良好接觸，東邊有暴露的黑色黃鐵礦碳質頁岩。這些都是香港罕見的地質特徵。

The site is of geological interest, to the west of the pier there is a good contact of granite with sediments and to the east there is exposure of black pyritic carbonaceous shales. These are rare geological features in Hong Kong.

24

蝻蛇尖 Sharp Peak

該地點具有地質意義，碼頭的西邊有花崗岩與沉積物的良好接觸，東邊有暴露的黑色黃鐵礦碳質頁岩。這些都是香港罕見的地質特徵。

The site is of geological interest, to the west of the pier there is a good contact of granite with sediments and to the east there is exposure of black pyritic carbonaceous shales. These are rare geological features in Hong Kong.

25

鹹田灣 Ham Tin Wan

該地點具有地質意義，碼頭的西邊有花崗岩與沉積物的良好接觸，東邊有暴露的黑色黃鐵礦碳質頁岩。這些都是香港罕見的地質特徵。

The site is of geological interest, to the west of the pier there is a good contact of granite with sediments and to the east there is exposure of black pyritic carbonaceous shales. These are rare geological features in Hong Kong.

26

西灣亭 Sai Wan Pavilion

該地點具有地質意義，碼頭的西邊有花崗岩與沉積物的良好接觸，東邊有暴露的黑色黃鐵礦碳質頁岩。這些都是香港罕見的地質特徵。

The site is of geological interest, to the west of the pier there is a good contact of granite with sediments and to the east there is exposure of black pyritic carbonaceous shales. These are rare geological features in Hong Kong.
